---

## Objective

A motivated and detail-oriented software engineer with a strong foundation in **Python**, **Machine Learning**, and **Deep Learning**. Seeking an opportunity to contribute to innovative projects and leverage my technical skills in a dynamic work environment.

---

## Skills

- **Programming Languages:** Python, Java, C++
  - **Technologies:** Machine Learning, Deep Learning, SQL, TensorFlow, Keras, Scikit-Learn
  - **Web Development:** HTML, CSS, JavaScript
  - **Tools:** Git, Docker, AWS, Azure
  - **Databases:** MySQL, PostgreSQL
- 

## Experience

### Software Engineer | ABC Technologies

July 2020 – Present

- Developed and deployed machine learning models for predictive analysis, increasing process efficiency by 25%.
- Built end-to-end automation pipelines using **Python** and integrated with AWS.
- Collaborated with cross-functional teams to improve product features and backend infrastructure.

### Junior Software Developer | XYZ Innovations

June 2018 – June 2020

- Contributed to web development projects using **JavaScript**, **HTML**, and **CSS**.
  - Worked on **SQL** queries and managed databases to support various internal applications.
  - Participated in team meetings and contributed to project planning and implementation.
- 

## Education

- **Bachelor of Technology (B.Tech)**, Computer Science and Engineering  
*University of XYZ, 2018*  
*CGPA: 8.5/10*
- 

## Certifications

- **Machine Learning with Python** (Coursera, 2020)
  - **AWS Certified Solutions Architect – Associate** (2021)
- 

## Projects

### AI Chatbot using NLP

- Developed a chatbot using **Natural Language Processing (NLP)** and **Python**.
  - Integrated the chatbot into a web application for customer service.
-
